General Information and Instructions to Authors

THE JOURNAL OF GERONTOLOGY is a bimonthly journal of the Gerontological Society. It publishes original manuscripts and review articles dealing with or bearing on the problems of aging from the fields of natural, medical, and social sciences. Preference will be given to manuscripts containing observational data.

The Gerontological Society and Editors accept no responsibility for the views and statements of the authors. Lack of adherence to instructions may result in delay of publication.

1. All manuscripts should be addressed to the Editor-in-Chief, Harold Brody, PhD, MD, State University of New York at Buffalo, School of Medicine, Buffalo, NY 14214.

2. Papers should rarely exceed 15 typewritten pages, including references, tables and illustrations. Papers must be typed double-spaced (including references) on white paper 8½" × 11" and submitted in original and 3 copies.

3. Author's full name, academic degrees, and the institution of affiliation should be shown on the title page.

4. Each author is required to furnish an abstract of not more than 150 words which can be used directly by abstracting journals. This abstract should describe the problem being investigated, the type of subjects used, the methods used, and a brief summary of findings. It is in addition to the usual summary of 300 to 400 words.

5. A condensed title for running page headline, not to exceed 40 letters and spaces, should be supplied.

6. Tables should be typed on separate sheets. General footnotes which pertain to a table as a whole are typed immediately below the table and are preceded by the word *Note* which is followed by a colon. Specific footnotes follow. The reference marks are superscript small letter ($^{a, b, c, \cdots}$), with the footnotes arranged alphabetically by their superscripts. The asterisk and double asterisk are used only for the special case of indicating the probability level of tests of significance.

7. Authors are requested to omit the use of footnotes. When used, footnotes, including those attached to the title and to authors' names, should be numbered consecutively throughout the paper with superscript arabic numerals.

8. Each plate must be arranged by the authors. If illustrations are larger than the manuscript sheet size, small prints should be submitted with the manuscript to facilitate mailing to reviewers. Clear glossy prints are preferred. Drawings should be in India ink on white paper. If background lines are used, they should be blue. All lettering should be done with a lettering guide large enough to give 2 mm. letters in the final reduction. Maximum plate size is 5¾" × 8¼" (if legends are to be included on the same page, the size should be correspondingly smaller). Final single column plate width is 2¾". The desired reduction of figures should be clearly indicated on the margin of the drawing. Photographs and original drawings will be returned to the authors only when requested within 30 days after publication of the paper. Color plates are at the expense of the author.

9. Show all references in the text by citing in parentheses the author's surname and the year of publication. Example: " . . . a recent study (Jones, 1975) has shown . . ." If a reference has two authors, the citation includes the surnames of both authors, each time the citation appears in the text. If a reference has more than two authors, the citation includes the surnames of all the authors the first time the citation appears in the text; later citations of the same reference include only the surname of the senior author and the abbreviation "et al." If the reference list includes more than one publication in the same year by a given author or multiple authors, citations are distinguished by adding, a, b, etc. to the year of publication. Example: ". . . a recent study (Jones, 1975b) has shown . . ." Several references cited at the same point in the text are separated by semicolons and enclosed in one pair of parentheses. The order is alphabetical by author's surname or, if all by the same author, in sequence by year of publication. Examples: "Recent studies (Brown, 1975; Jones, 1974) have shown . . ." "Recent studies (Jones, 1975a; Jones 1975b)."

10. The entries in the reference list are arranged alphabetically by author's surname and are not numbered. The reference list includes only references cited in the text and should not include references to private communications or unpublished work. Use the following form (do not abbreviate titles of journals): *Journals:* Botwinick, J., West, R., & Storandt, M. Qualitative vocabulary test responses and age. *Journal of Gerontology,* 1975, *30,* 574-577. *Books:* Rockstein, M. (Ed.) *Theoretical aspects of aging.* Academic Press, New York, 1974. *Chapters:* Timaris, P. S., & Meisami, E. Changes in gonadal function. In P. S. Timaris (Ed.), *Developmental physiology and aging.* Macmillan, New York, 1972.

11. Reprint price list and order blank will be sent to author with galley proof.

12. Author's alterations of the galley proof in excess of 10% of cost of composition will be charged to the author.

13. Submission of a paper to this journal is held to imply that it has not been published or under consideration for publication elsewhere, and, if accepted for the JOURNAL OF GERONTOLOGY, is not to be published elsewhere (except as Society Proceedings) without permission.

14. Acceptance of manuscripts will be based on recommendations of the Section Editors, who will correspond directly with the author.
